DETAILED ACTION

Receipt is acknowledged of the election and amendment filed 05/06/02.

Election/Restrictions

Applicant's election with traverse of Group I in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the close relationship between the two groups would not entail an undue burden in terms of searching. This is not found persuasive because the search for the method of preparation belongs in class 523. The search for the composition falls under class 424 and 623. As such, the search for both groups would indeed entail an undue burden.

The requirement is still deemed proper and is therefore made FINAL.

Claims 18, 19, 21, and 22 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2165

Claim 7 is indefinite in that although it sets out "phosphate-containing inorganic compounds", the Markush Group includes calcium carbonate. Applicant is requested to clarify or reword the claim if the calcium carbonate is to be added in conjunction with the carbonate-containing apatite.

Allowable Subject Matter

Claims 1-6, 8-17 and 20 are in condition for allowance.

Conclusion

Clarification of claim 7 , and cancellation of the non-elected claims would place the application in condition for allowance.

Constantz et al is cited as a patent of interest.
